

Marcia "Missy" Tillman Assad, R.N., IVF Coordinator

*"As a female,
I know how few
opportunities there are
for a woman to learn
about her own body
as it develops and,
more importantly,
the warning signs
to be mindful of.
As a nurse specialist
and IVF coordinator,
I am dedicated
to filling that void
with the kind
of self-knowledge
that fosters long and
healthy lives."*

Education and Certifications

"In addition to my formal training as a registered nurse and IVF Coordinator, I have made it my personal quest to continually further my education. The field of Infertility and Women's Health changes rapidly and it is imperative that I stay up to date with the latest information as it relates to the care of women. I also had a personal goal of completing my degree in business and have recently graduated with high honors from Mulligan College."

Graduate Jefferson Davis Junior College, Associate Degree in Nursing
Milligan College, Bachelor of Science in Business

Certification N.C. C. Certified for Inpatient Obstetrics; ACTS Certified

Extended Education ...Hands-on Trans vaginal Ultrasound Imaging, National IVF Nurses Conference; Clinical and Practical Applications in the REI Setting; 17th Annual IVF and Embryo Transfer; World Congress on IVF and ART; ARM International – Preparing For the 21st Century

The Dedication you Deserve

"My decision to become a nurse stemmed from my desire to help people. To me, this means truly caring for each patient as an individual and providing the best care possible. I provide one-on-one care by meeting with each patient, discussing protocols and treatment options, and by working with Dr. Assad in both the clinic and hospital setting for most of the fertility related procedures. My patients deserve to feel comfortable and relaxed with all aspects of their treatment and my experience and compassion helps to reassure the women I care for."

Former Coordinator..... IVF program and Office Manager, Childbirth Education Classes – from early pregnancy to postpartum, Houston, Texas; Outpatient operating room

Assisted..... with numerous seminars and lectures relating to infertility

Instrumental..... in the development of Southwest Fertility Services (with Dr. Assad), with the planning of a new L.D.R.P. unit and cross-training of employees, as a patient liaison for pregnant women

A Lifetime of Experience Helping Women

"I spent 12 years as a labor and delivery nurse in Houston, Texas. This was the groundwork for my entrance into the exciting and rewarding field of infertility treatment. Shortly after moving to New Mexico, Dr. Assad and I opened and developed a very successful fertility program. We helped thousands of women, from all walks of life, find personalized solutions to their unique problems. I look forward to working with you, answering your questions, and helping to make you feel comfortable when you come to see us."
